Project 1: Working With Data - LinkedIn Top Skills

Observation I : The Global Top Skills of 2016 list

The Global Top Skills of 2016 list has all the

categories for marketing skills and how Some

countries are ranking it.This leads me to manage

my view to what steps marketing needs and what

should i develop in my career so I can make right

decision .
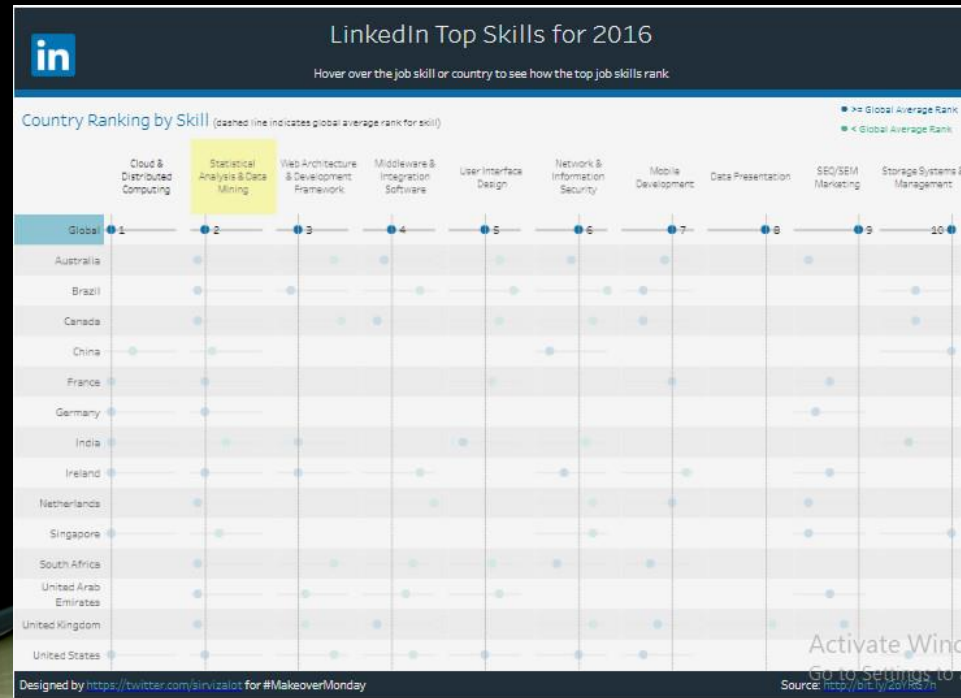

Observation II : United Arab Emirates

Being in Arab region , I'm interested in what's going on the United Arab Emirates marketplace. What I noticed is that United Arab Emirates has a such high demand for statistical analysis and data mining skills to stay competitive. This make me happy because I get more encourage to stay and study more statistical analysis track .

Observation III : Mobile Development

The Mobile Development category has low demand than I expect . In other words, demand came in #7 across the global and this skillset is very much in demand as I thought before . Every Entity or project thinking of doing Mobile Application for their work .
